

March 1, 2008

Dear Fellow Structural Engineer,

The SEAoO is jointly hosting the Sixteenth Annual Conference of the National Council of Structural Engineers Associations (NCSEA). This conference is being held in Cleveland, Ohio, October 23rd thru 25th, 2008.

The SEAoO Board of Directors would like to take this opportunity to showcase designs or buildings done by the Ohio structural engineering community. We would like to present each NCSEA delegate with a brochure about unique, built in Ohio, structurally interesting projects.

We would like to ask you, our member, to write a short article about a project you designed, which you would like to have included in the brochure. The article should be a couple pages long, and should highlight the interesting structural aspect of the project.

The SEAoO Board of Directors will award the most interesting article with a Gold Sponsorship of the NCSEA Conference. That Gold Sponsorship entitles the submitting Company to recognition in the Structure Magazine as a sponsor of the engineering community. The Company name will be recognized in the Conference Program and the Company logo will be noted as SEA sponsor for one year on SEAoO website. Each author will also receive a copy of the publication.

We hope to receive a sufficient number of articles to make this idea a reality. If you are thinking about writing such an article or just have questions about the project please email me at [**gbbryc@agengineers.com**](mailto:gbbryc@agengineers.com). The deadline for the article submission is March 15, 2008.

Gretchen Bryc, PE
President, SEAoO
